ASSIGNMENT 01

Git Mastery & Problem Solving

TRACK	DUE DATE	WEIGHT
Backend .NET	One Week From Issue	Graded Assignment

> **Objective:** Sharpen your problem-solving skills on LeetCode, build real command-line fluency with Git, and practice communicating technical knowledge publicly on LinkedIn.

01 LeetCode Challenge

Solve the following problem and keep your solution in your public LeetCode profile.

- **Two Sum** https://leetcode.com/problems/two-sum/description/

02 Git Command Deep-Dive

Research each command below. For every command, prepare a short, real-world scenario explaining when and why you would use it — write this explanation in Arabic in your submission document.

- `git squash`
- `git merge vs git rebase`
- `git help`
- `git cherry-pick`
- `git clean`
- `git grep`
- `git blame`
- `git bisect`
- `git shortlog`
- `git prune`
- `git worktree`
- `git verify-commit`
- `git filter-repo`

03 LinkedIn Post

Publish a LinkedIn post covering: git merge vs. rebase, git squash, and git cherry-pick.

- **Do NOT use AI-generated text — write it yourself.**
- Use your own images / diagrams, not walls of text.
- Keep it clean and well spaced — short lines, clear structure, minimal words.

04 Submission Requirements

Upload one .zip file to the course website containing:

1	URL of your LeetCode account / submission
2	Every Git command, explained in Arabic with a real-world scenario
3	Link(s) to your LinkedIn post(s)

> ⚠*Late or incomplete submissions may affect your grade. Name the archive clearly, e.g. YourName_Assignment01.zip*
